Industrial and Commercial.

MINE, MILL AND RAILROAD.

The Carnegie company, of Pittsburg, which produced more iron and steel in October than in any previous month in its history, proposes to soon begin the erection of four additional immense blast furnaces. When the new furnaces are completed this company will have a at that point. total annual capacity of about 1,700,000 gross tons of pig iron, or nearly oneninth of the present total annual capacity of the whole country.

A charcoal blast furnace which is soon to be erected at Ogden, Utah, will be 55 by 11 feet. It will have a 6-foot Steel company, at Wilson's Station. vertical blowing engine, and will be near Pittsburg, is running on cold equipped with iron stoves. The pipe rolled steel. The company recently rewill have a daily capacity of from to be used for skates. thirty to forty tons of gas and water pipe. A general foundry and machine freight from Chicago continues to deshop will also be built. Negotiations cline, the total for the past week having are pending for the establishment of a small rolling mill for the manufacture 46,476 tons in the previous week and of merchant iron, for a stove foundry is among the posibilities. It is hoped last year. to have all these enterprises in active operation early in the spring of 1895.

The armor-plate department of the Bethlehem Iron company, of South Bethlehem, Pa., is to have important additions made to it. Two large openhearth furnaces are to be added to the four now in place, and a large plate rolling train is to be installed in the same building.

Among the metal exports from Baltimore during the last week in October were 500 kegs of nails and 26,880 pounds of wire to Dublin. Frequent consignments of nails and hardware are made to the West Indies, but exports of American nails and wire to a British steady selling of sugar unsettled the port, especially in the quantities shown general list, which closed nearly steady. here, are new and worthy of note. It seems to show that American manufacturers are beginning to take advantage of the close approximation of prices in

A Pittsburg dispatch says: D. B. Oliver, of the Oliver Iron and Steel company, says that the big new tir plate mill projected on the South Side before the election will now certainly be built as a result of the Republican victory at the polls. The Olivers and others interested in the venture are busy getting ready the plans. The company will be incorporated shortly with a capital of about \$1,000,000. The contracts for erecting the plant will be given out some time soon after the first of the year and the work will be started as early as the weather will permit. The plant will give employ ment to 500 hundred men as soon as it is completed and twice as many before many months after. It is proposed to make the new mill the largest of its kind in the United States and one of the largest in the world. The estimated cost of the mill, excluding the cost of the site, is \$400,000.

Manufacturers and dealers are hopeful of a fair volume of business in holi day specialties, and are stocking up accordingly. In regular lines of business a more cheerful feeling is clearly ap parent as a result of the elections, which have demonstrated that tariff tinkering will no longer have to be taken into consideration in contracting fo the future. Orders that have been held back will make an important aggregate This is particularly true of the iron and weather is having the natural effect of stimulating inquiry for winter goods but as yet the demand for spring neces sities has failed to develop.

MINOR INDUSTRIAL NOTES:

Pittsburg trolley cars now carry mail The Chester Steel Casting company, at Chester, proposes to erect an addi tion to its foundry.

The Carrie Furnace company of Pittsburg has increased the wages of its day laborers from \$1.05 to \$1.20 per day. The Pennsylvanio railroad has sev enty-five men repairing its telegraph

line between Berwick and Nanticoke. Charles F. Case has been appointed traveling freight agent of the Erielines. with headquarters at New York city. Earnings of the Western New York

and Pennsylvania railroad for the last ten days of October increased \$10,500. It is reported here that earnings for the second week of November will show for the St. Paul another large de-

The product of the billet mill, as well as of the wire rod mill of the Illinois Steel company, at Jolliet, Ill., are completely sold up for the remainder of the

STOCKS AND BONDS.

By the United Press.

New York, Nov. 13.-The railway and miscellaneous stock market today was compound soon does away with every miscellaneous stock market today was controlled by the question of a new government bond issue, but the street did not know anything official until after the close of business. In the early and the control of the contro trading the market ruled stronger and higher. The rise at this time was equal to ¼ to 2¼ per cent. This was succeeded by a fractional recession, but when Western Union moved up 11/4 to 901/4, the whole list improved sympathetically. In the last hour there was heavy selling of sugar, the stock falling 1%. The Net changes show losses of 1/4 to 13/4 per cent. Total sales were 201,000 shares.

The range of today's prices for the ac tive stocks of the New York stock market are given below. The quotations are fur-nished The Tribune by G. du B. Dimmick, manager for William Linn, Allen & Co., stock brokers, 412 Spruce street, Scran-

FOR MEN MUST WORK.

The Many Uncomplaining but Weary

They Go Without Rest to Make Sure of Happiness for Others.

Overwrought Nerves Work Half Fed and Cry Out with Pain.

For eight out of every ten who ever take a vacation, there remains behind some hard working, uncomplaining toller who is only too happy if he can provide a rest and change for those dear to him.

And it is lucky if in many cases this self-denial does not get to be regarded as a duty, and the thought of a rest for one's self a thing impossible.

The number of such overwrought men, who simply toll right on without so much as a two weeks' respite a year,

is surprisingly large. Grateful wives and children should see, then, that these cheerful and un-selfish fathers and brothers do not "work themselves to death." Signs of failing strength and nervous weakness, that none so quickly detect as they, should be promptly and firmly com-batted. A thorough feeding of wornout nervous tissues by Paine's celery compound soon does away with every

used-up blood again capable of feeding the system, and purifies it of all humors

that work harm to the body.

There are countless men so absorbed In business that they disregard the in-dications of nervous weakness and duty of those members of the house hold who see this gradual decline health to insist on a building up of the "run-down" system and a strengthen-ing of the nerves and brain by a vigorous tonic like Paine's celery compound. In every city in this country there are

homes that have escaped sickness and misfortune because some prudent member has known the value of Paines celery compound for strengthening nerves and brain, purifying the blood, and building up the vigor of the tired body. For overworked men, for nervous "run-down" women, in a bloodless con dition, Paine's celery compound is the regular prescription of family practitioners all over the country. It has permanently freed thousands from neuralgia, rheumatism, dyspepsia, kidney troubles, and blood diseases by invigorating the body, purifying the blood and feeding the nerves. Nothing gives strength like Paine's celery compound.

TO OUR PATRONS:

Washburn-Crosby Co. wish to assure their many pat-rons that they will this year hold to their usual custom of milling STRICTLY OLD WHEAT until the new crop is fully cured. New wheat is now upon the market, and owing to the excessively dry weather many millers are of the opinion that it is already cured, and in proper condition for milling. Washburn-Crosby Co. will take no risks, and will allow the new wheat fully three

months to mature before grinding.

This careful attention to every detail of milling has placed Washburn-Crosby Co.'s flour far above other
